29% or 879,000 pounds with less than 50 ppm requires third-country disposal

**15% or 548,000 pounds of the total weight contains greater than 50 ppm PCB**

88% or 484,000 pounds with greater than 50 ppm requires third-country disposal

Taken from **Enclosure 3** of: Report to Congress. Foreign-Manufactured PCBs at US Military Installations Overseas. Prepared by Department of Defense in consultation with Department of State and Environmental Protection Agency. March 1999.

Comment: Page 5 of the document notes, "The PCB material in the 'detect to 49 ppm' category, which accounts for 85% of the total inventory by weight, is based on labels and user knowledge. US military installations overseas did not do any additional testing for this inventory."
